

May 28, 2020

Greetings Pathways Families:

The Pathways family and staff are very appreciative and grateful to serve in the great Memphis community. We know this has been a difficult and unprecedented time, and matters are changing rapidly each day. As a school community, we will remain steadfast in providing our students with a quality education through the teaching and learning process. Additionally, the Pathways family wants to send a **BIG CONGRATULATIONS** to the senior class of 2020!

As the 2019-2020 school year is quickly coming to a close, we want to inform parents that re-enrollment for the 2020-2021 school year will begin soon. The Pathways family is eager and ready to begin a new school year, and want each of you to continue your high school career with us. With our program at Pathways, learning is continuous, and we help students realize their full potential. Our lines of communication are always open if you have questions, and we are willing to assist parents and students in any way possible. We want to reiterate that as we begin to move into the summer months, it is important for students to remain engaged with their learning. We will continue the process of open communication during this time, and our weekly updates are as follows:

- **CONGRATULATIONS TO THE SENIOR CLASS OF 2020!** The Pathways family is in the process of preparing and scheduling a celebration. More information is forthcoming.
- Summer SGI classes began on May 26th, and will be in session for the next 10 weeks.
- If your student has a school issued laptop not being utilized, please inform your student's teacher. We want to ensure we are providing technology assistance to those who need this support.
- **JUNE 5th** will be the **FINAL DATE** for ALL SENIORS to have courses completed.

If the staff of Pathways can help support you and your child with learning needs, feel free to contact centers. Again, we thank each of you for your support through trying times, and remember to remain positive and safe.

Respectfully Submitted,

Roderick L. Payne, Ph.D.
Principal
